

How To Load(Copy) A Ready Made Shared Campaign by Dave Fullmer

<https://www.youtube.com/watch?v=zjESXRqm-hU&feature=youtu.be>

This autoresponder feature is available to paid users of All In One Profits. Basic level users cannot create shared campaigns, just load (copy) Ready Made shared campaigns

When you join All In One Profits, you automatically receive an AIOP Response-autoresponder account based on your chosen user ID.

First of all, let's describe a campaign. Within that campaign, you can set up an autoresponder (a series of automatic follow up letters), create a sign up form and attach it to a lead capture page to lead prospects to your autoresponder and build your list. The lead capture page, also known as a squeeze page, is a webpage with a lead capture form with the purpose of creating interest and a call to action. That action by the prospect usually would be to submit their information to receive messages from your AutoResponder.

Your initial campaign is not set up with either pages nor does it have any messages in the AutoResponder. You have to install your own messages for whichever niche you wish to promote.

If you intend to promote AIOP, the company has provided a Ready Made Campaign with several splash and lead capture pages, and 19 messages installed in the autoresponder and shared it with all users. You can load (copy) the company ReadyMade campaign in your autoresponder account or it is possible to load a campaign from a sponsor or team leader that you may be following. This PDF and associated video shows you how to get your AIOP company Ready Made Campaign set up and have all your subscribers added to your own list.

First login to your back office and click on "AutoResponder"

Note that at the top left corner it shows that your active campaign is the campaign you received initially. When ever you login to your back office the default campaign is your initial campaign and if you wish to work in a different campaign, you have to make that campaign active. You do that by clicking on “Edit Campaigns” and then clicking on the “Go” button to choose the campaign.

Warning: What ever action you want to do within any campaign, ALWAYS be sure that you note at the top left corner that you are in the desired Active Campaign

To Load your “Ready Made Campaign” click on “Edit Campaigns”

To create your Ready Made Campaign click on “Ready made campaign”. (If you would need to make a Shared campaign you would click on “Make a shared campaign” but you are just copying, loading a Ready made shared campaign now, so you will use just the “Ready made campaign” button).

Note: One of the features that an upgraded Pro Member has is the ability to create a Shared Campaign. Basic members don't have that feature so there will be a slight difference in the next screen member view. What Pro Members will see when they click on “Edit Campaigns” is the following image. Basic Members will see the same screen but it will not have the “Make a Shared Campaign” box on it.

Do not get confused. “Make a Shared campaign” means “to set up a campaign to share with other people ” as and does not mean “set up a campaign someone has provided for me to load on my computer”

The screen share image for Pro Members follows:

Add new campaign

Campaign ID : Internal ID for this campaign
Campaign name: Name that will show in the emails.
Campaign Email address : Email address you want to use
for this campaign
(can be the same as your other campaigns)

Or load (reload) a ready made campaign

Basic members won't see a screen that has the "Make a Shared Campaign" choice on it since they can't Share campaigns with anyone else.

The ReadyMade campaign can be shared "Public" so all users will see it, or can be shared "Hidden",

Basic Members will see this screen:

Fill out the form:

Put your Campaign ID in the Campaign ID box (Only you will see it).
Put your name in the Campaign Name box (Subscribers will see it).
Put your username or program ID in the User name or ID box (for the program you promote and the campaign is made for)

If the Ready Made campaign is “Public” shared and you have the option to check the “Copy” button, you don't need the campaign number, so leave Campaign number box empty.

If the Ready Made campaign is shared as “Hidden” and you have the campaign number from it's creator, then fill out the campaign number in the “Campaign number” box.

Click on Submit to create your new campaign.

Once you have created your new ready made campaign, when you log into your back office, your Active campaign will still be the initial campaign you created but your new campaign will be added to your list of campaigns:

Notice in the top left corner of the screen, the active campaign is the new campaign and notice that under AIOP Campaign is a list of 6 splash pages all set up to capture leads for this campaign and that the campaign number is the 5 digit number at the end of each splash page URL. If you click on Autoresponders in the menu bar you can edit the messages to make sure they are as you want them.

Click on “Edit Autoresponders” to look at and edit messages. It is always a good idea to check your messages to see if there are any points you wish to edit or add, but the “Shared” campaign for promoting AIOP is completely ready to use once you load (copy) the company Shared campaign.

You will see the following:

When you do a test of your autoresponder messages, you will receive all 19 of your messages in your email box but do not be concerned that the messages don't convert the variable codes. In the test mode these codes are not converted but if you fill out the form on your splash page and submit, you will see by the immediate message that the variable codes are converted.
